Approved GSA Pricing

GS-03F-0160V

Awarded GSA Labor Title	Awarded GSA Hourly Rate
Project Manager	\$120.91
Engineer	\$91.89
Technician II	\$84.15
Technician I	\$79.80

1. Job Title: Project Manager

Minimum/General Experience: Minimum of five years of Project Management experience, with at least three years in Project Management supervision. Must have a demonstrated ability to manage programs and multiple projects and to take corrective action, monitor work, manage conflict, and coordinate the activities of others.

Functional Responsibility:

- Has the ability to design and implement a balanced coaxial head end and distribution system.
- Complete responsibility of system integration and system installation for various projects.
- Provide technical and functional guidance by managing all field personnel on the job site, providing a detailed work schedule for planning and allocation of labor and engineering support to sales staff and technicians.
- Possess knowledge of cable systems, fabrication, installation, systems operations and integration, control systems, AV test equipment and procedures, Windows OS, system signal flow, component setups and troubleshooting skills.

Minimum Education: B.A. or B.S. degree or five years of field experience in A/V systems installation and design.

2. Job Title: Engineer

Minimum/General Experience: Minimum four years of specialized experience in engineering plus three years general experience in a related field.

Functional Responsibility:

- Possesses knowledge of design and installation of coaxial head end and distribution systems.
- Execute complex technical work, and carry a high level of responsibility in conceptualization, planning, and coordination of assigned projects.
- Create equipment lists, floor plans, rack and console elevations, conceptual and control diagrams.
- Has working knowledge of control systems, optics, acoustics and ergonomic principles in a production and presentation environment.
- Perform system analysis, business process reengineering, requirements definition, enterprise network consulting, design, installation, configuration, troubleshooting and support.
- Lead A/V system design and implementation across project sites.

Minimum Education: Four years of college with concentration in electrical engineering and design.

3. Job Title: Technician II

Minimum/General Experience: Two to four years field experience, including installation and troubleshooting of video and communications systems and equipment.

Functional Responsibility:

- Responsible for integration and installation of video systems.
- Also responsible for installing programs into control processors as well as installation of complex control systems.
- Installs A/V components under the direction of the Project Manager.
- Completes wiring and termination, cable pulls, soldering, equipment configuration/calibration, project system alignment, audio and control system testing, troubleshooting and other tasks as required.
- Ability to test integrated system and train client on use.
- Capability to provide programming and troubleshooting.
- Capacity to supervise other technicians and serve as site superintendent.

Minimum Education: HS/Vocational School Diploma or Technical school graduate in electronics or A/V installation.

4. Job Title: Technician I

Minimum/General Experience: Two years of field experience, including the installation and troubleshooting of video and communications systems and equipment.

Functional Responsibility:

- Responsible for integration and installation of video systems.
- Service and maintain A/V systems and sub-systems.
- Perform preventative maintenance on audio-visual equipment by scheduling, performing, and documenting routine and preventative maintenance on all assigned AV systems equipment.
- Ability to test integrated system and train client on use.
- Works with internal clients to ensure A/V requests are processed.

Minimum Education: HS/Vocational School Diploma or Technical school graduate in electronics or A/V installation.
